

## **Call for Papers**

### **IMPORTANT NOTES**

- Only one Conference Paper (Oral or Poster) will be accepted per senior (first) author.
- The senior (first) author of a Conference Paper will have to be registered to the SGA Québec 2017 Meeting (registration fees paid) to have his/her Conference Paper included in the final Program.

Extended abstracts should be no more than 4 Letter-size (8.5x11 in. – North American standard) pages including figures, tables and references.

### **INSTRUCTIONS FOR AUTHORS**

- Extended abstracts should be no more than 4 Letter-size (8.5x11 in. – North American standard) pages including figures, tables and references.
- Type your *Conference Paper* in the template provided (**SGAQuebec2017\_Conference- Paper\_template.docx**). Use the fonts, styles and sizes indicated in the template. Note that a very simple format has been used to minimize potential problems. The template is provided as a Microsoft Word file but you may prepare your abstract in any word processing application as long as you follow the standard format and can print it to a pdf document.
- Do not exceed 4 pages. We are using a letter format (8.5 x 11 in. – North American standard)

### **THE STRUCTURE OF THE CONFERENCE PAPER IS AS FOLLOWS:**

- **Title of the *Conference Paper*, Authors and their affiliation(s)**

- **Abstract:** No more than 200 words long.

- **Body of text**

Subheadings are labelled 1, 2, 3, etc. Second level subheadings should be avoided to save space but if you need them they should be numbered 3.1, 3.2, 3.3 etc. Do not use more than two levels of headings.

- **Acknowledgements**

- **References.** Reference citations in the text and the reference list should follow the style used by the journal *Mineralium Deposita*. See:

<http://www.springer.com/earth+sciences/geology/journal/126>

References such as “personal communications” or “unpublished data” cannot be included in the reference list, but should be mentioned in the text in parentheses. Papers which have been accepted for publication should be included in the list of references with the name of the journal and “in press”.

**Figures:** Figures may be presented in colour. The conference proceedings will be published in both printed (on request) and digital (pdf) versions. Insert figures in the appropriate place as good quality jpg files in your original word processed document. Each figure needs to be numbered and must have a caption typed by you. Figures should be designed to be legible at either one or two full columns, full width. Note that if you design your figures at single column width this will minimize the amount of additional formatting you need to do.

Any reference to a figure in the text should be as follows – Figure 1 or (Fig. 1).

All figures must be original work of the author(s) no figures from other works will be accepted even if permission has been obtained to use them.

**Tables:** Insert tables as appropriate in the text. Word processed tables can only be inserted into one column. If you need to include a full page width table then you should save it as a high quality jpg file first and insert it as though it were a figure. Centre tables in the column/page. Give each table a title. Any reference to a table in the text should be as follows (Table 1).

## **Instructions for Accepted Posters**

**To be provided soon**

## **Instructions for Oral Presentations**

**To be provided soon**
